## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-10, drawn to guiding a robotic apparatus, classified in class 701, subclass 200.
  - II. Claims 11-14, 18-20, drawn to determine an error in a robotic apparatus, classified in class 701, subclass 26.
  - III. Claims 15-17, drawn to external source for directing a robotic apparatus, classified in class 340, subclass 991.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I-III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention a guiding system/apparatus has separate utility such as (1) guiding something (2) correcting\detecting errors in guiding system/apparatus (3) using an external source and traversing an area of interest for a guiding system/apparatus. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for one group is not required for other groups, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 3661

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
